

# Rex Barkdoll

WEB DEVELOPER | 720.237.7301 | REX.BARKDOLL@GMAIL.COM

Next Objective: In my current role, I feel that I've grown a lot, but have reached the limits of my job and have no more room to grow personally or contribute to making our product better. I am seeking new opportunities to grow and make meaningful contributions on a positive team. I am a huge advocate of education and creating a more engaging future for everyone. I'm also looking to gain more experience and confidence in engaging clients in meaningful conversations that solve their needs.

## EXPERIENCE

### PR Newswire 2012-Present

#### IMPLEMENTOR (WEB DEVELOPER)

Over a 3 year span of time, I've design matched or created new designs for over 1,000 client websites. I've also QA'd those and other client sites, ensuring a seamless and interactive experience across all browsers. Monthly, I hop on calls with clients to answer technical questions in non-technical ways and to resolve problems or speak to the features and benefits of our product. I also regularly develop jQuery solutions to common problems.

### eCollege.com (Pearson) 2012

#### WEB CONTENT ASSISTANT

Quality Assured over 2,000 online courses, led and teamed up with 1-20 other contractors to accomplish projects over a 6 month period. I enjoyed learning about the current and future state of education and being part of a positive and motivated team.

### BizHelper 2010-2012

#### WEB DESIGNER EXTRAORDINAIRE

Created multiple repeatable processes to improve workflow and save cost, deployed government websites (for DoD) and private company sites, upgraded client sites for WCAG 2.0/WAIA/Section 508 compatibility to ensure users with disabilities could access our client's sites without issue.

## EDUCATION

### B.S. in Mass Communications

Shepherd University 2010
